Information on the procedure and conditions for the GreenMLA® Green Management & Leadership Award 2023

1. Introduction

Environmental factors (Environment), social aspects (Social) and good corporate governance (Governance) are referred to as ESG criteria and reflect standards for sustainable business activity. GreenMLA® benchmarking integrates these sustainability aspects into a holistic concept for sustainable corporate governance and shows individual performance in comparison to other organisations. This results in potentials for further development of the company according to the IMLead® Integrated Management & Leadership concept. Overall, all aspects for sustainable management are reflected in the GreenMLA®

2. Participation

Companies from all countries can participate. For companies with their headquarters in Germany, Austria or Switzerland a prize will be awarded. The winners are entitled to use the title 'Green Management & Leadership Award 2023 for publicity purposes. Furthermore, these companies will be presented in detail in our media channel. In particular, the reasons for the award will be explained.

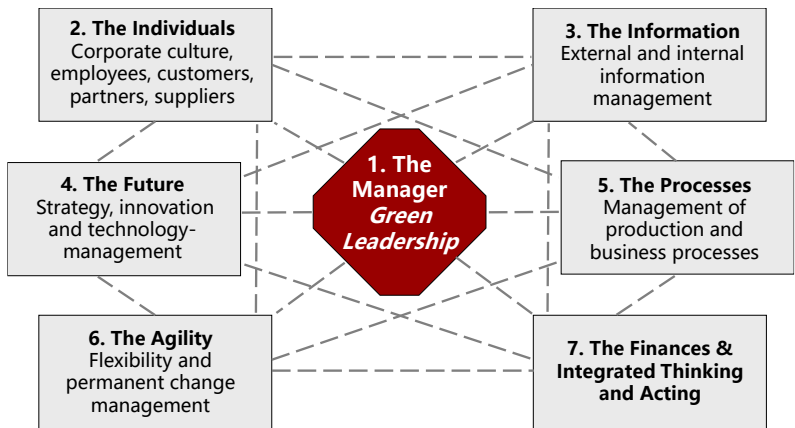

For participation in the GreenMLA® Green Management & Leadership Award we charge no processing fee. Every participant receives the confirmation of participation with signet and an individualised evaluation report that shows the current implementation status and identifies potential for further development.

3. Methodology

Methodological framework for the Green Management & Leadership Award in the concept *Green IMLead® Integrated Management & Leadership*. This concept brings together the different perspectives of management and leadership. At the centre is the top management, which leads the organisation (field 1). With sustainable leadership competences and within the framework of a sustainable corporate culture, the management is in dialogue with individuals as employees, suppliers and customers (field 2). The management of external information (market and environment) and internal information (data from processes, from the infrastructure, product data) are queried in field 3. Here, data management is linked to digital solutions, artificial intelligence and Industry 4.0 applications. A sustainable strategic orientation with innovations in new markets as well as in (green) technologies and business models are the main basis for meeting current and future market requirements (field 4). Appropriate management systems as well as production and business processes are required to successfully position products and services in the market (field 5). As such integrated systems are improved and developed in faster life cycles, agility and change management skills are also important (field 6). Finally, the business foundation is taken into account, which is reflected in the financial ratios. Rounding off, all areas need to be linked together, with the competence of integrated thinking and acting (field 7).

For the *Green Management & Leadership Award*, all seven areas are assessed with the three ESG perspectives (1) governance, (2) social aspects and (3) environmental factors. The GreenMLA® has a focus on Management & Leadership. Consequently, the area 'governance' is asked first in each IMLead® field.

Figure 1: Green IMLead® Integrated Management & Leadership

4. Benefit

Benefits for companies and organisations of participating in the GreenMLA® *Green Management & Leadership Award* are:

1. ESG criteria for environmental factors (Environment), social aspects (Social) and corporate governance show how sustainable a company is.
2. Customers are increasingly taking ESG criteria into account in their purchasing decisions. They want to know what kind of companies they are doing business with.
3. The *Green Management & Leadership Award* supports companies in positioning themselves in the corporate ranking as a green company.
4. ESG criteria are increasingly important decision-making factors for investors to evaluate companies in terms of sustainability-related opportunities and risks.
5. Future oriented companies are sustainable companies. Participation in the Green Management & Leadership Award 2023 shows the way to your sustainable future!

5. Implementation and submission deadline

30 April 2023	Deadline for submission of completed (online) questionnaires to the Clearing House SGIT Steinbeis Global Institute Tübingen Steinbeis University
Mai 2023	Analysis of the data by a panel of experts led by SGIT Steinbeis Global Institute Tübingen Steinbeis University Dispatch of the individualised evaluation reports to the participating companies Nomination of the finalists and selection of the award winners
